PROFESSIONAL SUMMARY

Small business web admin for 10 years. In charge of building code, developing site content, sourcing images, SEO and analytics. Comfortable working with HTML, CSS, Bootstrap, cPanel administration, Umami, Google Search Console. Began curating a custom, in-house CMS in April 2026 primarily focused on data sovereignty, reducing overhead costs, allowing staff to self-manage content. The dashboard also has custom-tuned analytics featuring actionable recommendations, quarterly reporting and maintaining continuity of care over branding by consolidating reporting from individual vendors under one platform. In addition to the base CMS model, I am working on a HIPAA-oriented variant with a focus on patient care, self-hosting and scope reduction by preventing PII from becoming PHI.

CERTIFICATIONS

CompTIA Security+ — May 2026

TECHNICAL SKILLS

Web Development: HTML, CSS, Bootstrap, responsive web design, accessibility (WCAG 2.2 AA), Lighthouse auditing, cPanel hosting administration

Content Management: Custom CMS (prototype), content creation and editing, photo sizing and web optimization, website migrations

Analytics & SEO: Google Analytics, Google Search Console, Bing Webmaster Tools, UTM campaign tracking

Email & Communications: Email authentication (SPF, DKIM, DMARC), provider migrations, deliverability troubleshooting, domain reputation management

Security & Compliance: CompTIA Security+, PCI DSS (SAQ B-IP), HIPAA security awareness, access control, phishing awareness training

Systems & Support: Microsoft 365, Windows 10/11, end-user training, technical documentation, vendor management

EXPERIENCE

Web Administrator + IT Admin 2016 – Present

Oasis at Wild Horse Ranch | Contract: Project-based + On-Call | Tucson, AZ

Sole web administrator and IT admin for a full-service event venue.

- Built a functional small business website with HTML, CSS and Bootstrap. Fully responsive, optimized for faster loading, SEO and analytics.
- Maintained and updated content based on venue events and photo refreshes.
- Created a custom CMS to meet venue needs, including elements of self-service for the purposes of content creation and management.
- Expanded in-house toolkits to reduce reliance on external vendors. A unified dashboard for marketing brought many services under one roof.
- Added Google Search Console tracking for SEO insights and metrics. Stood up a VPS for self-hosting Umami to drive dashboard analytics with a dedicated server.

- Set up security for email infrastructure. Diagnosed and resolved a bad neighbor IP blocklisting issue by switching domain hosting services.
- Created a fully PCI DSS SAQ B-IP environment, having passed multiple external third-party audits.
- Researched vendors and their wares, made cost estimates and presented quotes to executive management. Found solutions to cost-cutting measures, introduced new technology, trained staff on best practices and secured equipment for customer-facing use.

PROJECTS

Self-Service Marketing Dashboard (Prototype)

- A tool for non-technical users to interface with website management and have a real impact in live content. Domain owners control their own link-in-bio, post event listings, generate QR codes, create surveys and track analytics to help shape content creation suggestions.

Windows Server and Active Directory (AD) Lab

- Built a home lab with Windows Server 2022 as domain controller, joined three Windows 11 VMs, and configured Group Policy — password hardening, mapped network drives, and role-based access control (RBAC). Self-directed learning to support CompTIA Security+ certification.

ADDITIONAL EXPERIENCE

Married to an active-duty Navy servicemember during this period — short tenures reflect military relocations.

Library Page July 2012 – October 2014

Geasa-Marana Public Library

Troubleshooting public computers and printers, taught one-on-one computer classes to patrons, and handled front-desk customer service. First role where I explained technical concepts to non-technical users on a daily basis.

Sales Associate (Seasonal) October 2014 – January 2015

Best Buy

Sold consumer tech during the holiday season. Leaned on years of PC-building knowledge to help customers pick the right hardware.

Crew Member January 2016 – October 2016

Dunkin' Donuts

Fast-paced customer service — point-of-sale (POS) operations, cash handling, sales floor. Transitioned to the IT admin contract at Wild Horse Ranch after this role.

EDUCATION

Marana High School Diploma, May 2012

Honor Roll. Coursework in Computer Programming.
